

Carpet Pro CPU1T-CPU2T

Utilizing a metal handle, base plate, bearings, and brush roll, the Carpet Pro 1 and 2 are great for commercial or home cleaning jobs. Teflon bristles are deep cleaning and replaceable— saving you from buying a whole new brush roll.

As with most Carpet Pro uprights, the CPU 1T has a patented clean air bypass motor system. This prolongs the life of the vacuum by sending dirt away from the motor and directly into the bag.

Includes an automatic shut off if the machine over-heats.

The Carpet Pro 1T and 2T differ only in length of cord (the 2T is 10 ft. Longer). Models CPU1 and CPU2 are identical to the 1T and 2T, but do not come with tools

Weight	15 Pounds
Dirt Path	By-Pass - Direct to Bag
