## THE *SupraLite* LINE

With a motor that nestles low in the nozzle, the SupraLite is ideally suited to root out deep-seated dirt. With every rotation of the brushroll, particles shake loose, enter the powerful airstream and are carried away and trapped in the HEPA media bag.

## SUPRALITE CORDLESS

### UNTETHERED

No cord means no limits. Get the power of a regular vacuum without the inconveniences of winding and unwinding a cord, tangles and trip hazards, or running out of cord just before the job is done. Just pick up your Cordless SupraLite and go. Anywhere.

### LIGHTWEIGHT

The untethered SupraLite doesn't just save you the strain and aggravation of wrangling a cord, it also saves your back. Odds are it weighs less than the family cat, which means you can clean up those fur balls no matter where they hide.

### QUIET

The SupraLite purrs so quietly, you can clean without disturbing sleeping babies or drowning out the TV. Your cleaning range – and the window of time you have to get it done – just got a whole lot bigger.
